

CP 7000™ Capsule Polisher

The CP 7000™ is a critical piece of equipment in any large scale capsule manufacturing setting. Able to clean up to 7,000 capsules per minute, this machine uses soft brushes to remove any dust or debris from the outside of the capsule and a vacuum to carry it away, leaving capsules looking perfect.

The CP 7000™ is a plug-and-play unit with a vacuum, meaning that no additional components are required and that machine set up takes less than 10 minutes. It also has a variable speed setting, which allows for the user to control how quickly the capsules are polished. Compatible with most capsule fillers, the CP 7000™ comes with a 1-year warranty and lifetime technical support.

Main Benefits of the CP 7000™

- Compatible with all our capsule fillers
- Safe and effective GMP-compliant design
- Adjustable speed
- Easy to use
- Easily detached for thorough cleaning
- Easy maintenance
- Reliable operation

Specifications

Product	CP 7000
Output/min	7,000
Decompression	2.7 m ² -0.014 Mpa
Power UK	240 V; Single phase; 0.18 kW; 50 Hz
Power US	110 V; Single phase; 0.18 kW; 60 Hz
Dimensions (mm)	1160 x 360 x 780
Gross Weight	58 kg
Net Weight	40 kg
