

Hard Empty Capsules

Empty capsules are a great way to create custom supplement formulations and have several advantages over tablets and/or raw powders. LFA provides three different types of capsules in a range of standard sizes that will meet the unique needs of numerous products.

The types of capsules we offer are:

- **Gelatin** - Our empty gelatin capsules are GMO free and derived from completely natural sources of beef/pork, water, and a plasticizing agent such as glycerin. These capsules are affordable, come in a multitude of colors, and are easily digested.
- **HPMC** - The empty Hydroxypropyl Methylcellulose (HPMC) capsules LFA carries are derived from plant cellulose, making it suitable for vegetarians and vegans. HPMC is also a stable polymer with a low moisture content that makes it ideal for moisture-sensitive ingredients.
- **Vegetable** - LFA's empty vegetable capsules are made from tapioca, which is naturally fermented into starch-free and vegetarian pullulan. Pullulan capsules are optimal for health-conscious manufacturers and consumers.

Main Benefits of Hard Capsules

- Masks unpleasant tastes in powders
- Allows powders to be dispensed in an uncompressed form
- Gives versatility to easily prepare any doses compared to formulating a tablet
- Easy to swallow due to their shape and texture
- Can have a longer shelf life than tablets due to the layer they create around the ingredients

Specifications
