

PharmaCap™ Desktop Capsule Filler

The PharmaCap™ from LFA Machines is the ideal solution for compounding pharmacies, Amazon sellers, and R&D departments that are looking to produce small batches of products.

With the ability to produce 300 capsules every 3 minutes or 6,000 per hour, the PharmaCap™ desktop capsule filler is one of the fastest small capsule fillers on the market. One of the main advantages of the PharmaCap™ is that it is a fraction of the price of higher-output capsule fillers, which makes this desktop capsule filler versatile and affordable.

The PharmaCap™ is easy to use because of its simplistic design and comes with 3 capsule trays in a size of your choice from #00-2, allowing you to pre-fill the trays for accurate and consistent batch production.

This desktop capsule filler is also easy to clean and built entirely from 304 stainless steel with removable contact parts that are dishwasher safe, which means reduction in turnaround times between production.

Main Benefits of the PharmaCap™

- Easy to store due to compact and lightweight design
- Fills approximately 7,200 capsules per hour
- Requires no specialist skill to operate and service
- Manufactures capsule sizes #00-2 with a simple tooling change
- Meets all GMP and cGMP requirements
- Constructed from 304 stainless steel and easy to clean
- Makes low noise, which is ideal for busy working environments
- Possesses mechanical tamping system to ensure consistent weights
- Safe and easy to operate
